RESEARCH EXPERIENCE

Center for Interdisciplinary Exploration and Research in Astrophysics REU Northwestern University	June 2025 – Aug. 2025 <i>Evanston, IL</i>
- Conducted research focused on stellar collisions, dense galactic clusters, and machine learning. - Participated in multiple career development programs, such as RCTP (research communication training program) and Python workshops. - Prepared a writing deliverable, website, and poster related to project results. - Continued research during 2025-2026 school year.	
MISSFIT Student Research Lead Drake University	Jan. 2023 – July 2024 <i>Des Moines, IA</i>
- Developed the artificial gravity project for the student-led MISSFIT (magneto-ionization spacecraft shielding for interplanetary travel) collaboration. - Designed 3D printed proof of concept for a new approach to artificial gravity generator. - Organized team schedule and meetings and designated projects to other members. - Assisted in work of other subgroups, such as the computational and biological subgroups.
